

FATİH ONDAY

Electrical & Electronics Engineer

Phone: +90 538 871 74 71 **Email:** ondayfatih@gmail.com **LinkedIn:** linkedin.com/in/fatihonday

Location: Istanbul, Turkey **Driving License:** Class B **Age:** 25

PROFILE

Electrical & Electronics Engineering graduate from Balıkesir University with proven expertise in electrical installation design, site applications, and electronics manufacturing processes. Experienced in managing electrical installation design, as-built drawings, quantity surveying, and site coordination for large-scale public building projects; along with practical hands-on experience in SMD/THT manufacturing, Pick and Place automation, reflow oven thermal profiling, and IPC-standard PCB assembly. Combines advanced proficiency in CAD/EDA tools (AutoCAD, Dialux, KiCad) with strong component-level knowledge gained on the production line and job sites. Seeks to deliver multi-disciplinary value to Electrical Site/Project Engineering as well as Electronics Manufacturing, Hardware Design, and Process Development teams.

WORK EXPERIENCE

Electronics Manufacturing Engineer

Tulpar Technological Services

Apr 2026 - Jul 2026

- Managed operational workflows for SMD/THT assembly lines, Pick and Place automation, and stencil printing according to international standards.
- Conducted component stock tracking and production planning based on package footprints, tolerances, material characteristics, and Bill of Materials (BOM).
- Configured reflow oven temperature profiles according to leaded/lead-free soldering alloys to increase line efficiency.
- Practiced double-sided high-density PCB assembly, hardware prototyping, hand soldering, and visual inspection under IPC-A-610 standards.

Electrical & Electronics Engineer

Arem Electrical Engineering

Feb 2025 - Dec 2025

- Managed engineering documentation, revision tracking, and project workflows compliant with national building regulations for major public sector projects.
- Produced schematic drawings and electrical designs in AutoCAD focusing on cost and process optimization over traditional methods.
- Analyzed technical problems during site integration, provided rapid on-site solutions, coordinated field technicians, and monitored operational progress.

R&D Engineer Intern

Silter Advanced Ironing Systems

Jul 2024 - Sep 2024

- Contributed to hardware testing, circuit analysis, and hardware prototyping within the R&D department.

EDUCATION

B.Sc. in Electrical & Electronics Engineering

Balıkesir University

Sep 2020 - Jun 2024

High School Diploma

Kemal Hasoglu Anatolian High School

Sep 2015 - Jun 2019

SKILLS

AutoCAD, Dialux, Autodesk Fusion, Solidworks, KiCad, Proteus, Altium Designer, IPC Standards (IPC-A-610), SMD/THT Assembly, Pick and Place Operations, Reflow Oven Profiling, Design for Manufacturability (DFM), Embedded Systems, Hardware Prototyping
